

Softeco Sismat used devices Digitax 3GMDT Plus for the activation of the public transport service on-demand organized by ATM Milano.

 Softeco Sismat used devices **Digitax 3GMDT Plus** for the activation of the public transport service on-demand organized by **ATM Milano** and called Bus District.

The path of the vehicle is determined dynamically according to the demands of users who can contact the call center or ATM directly to the driver at the terminus.

The onboard equipment, in addition to providing the driver the necessary support for the completion of service (navigation system for indicating the path to follow, list appointments, lead/lag, etc.), Captures users' requests proceeding to schedule of the run directly on the device board.
